

## English

The Handheld Controller provides remote control of the Sprite Lite range of multiplexers. The Handheld Controller can control a single Sprite Lite and mimics the front panel keys.

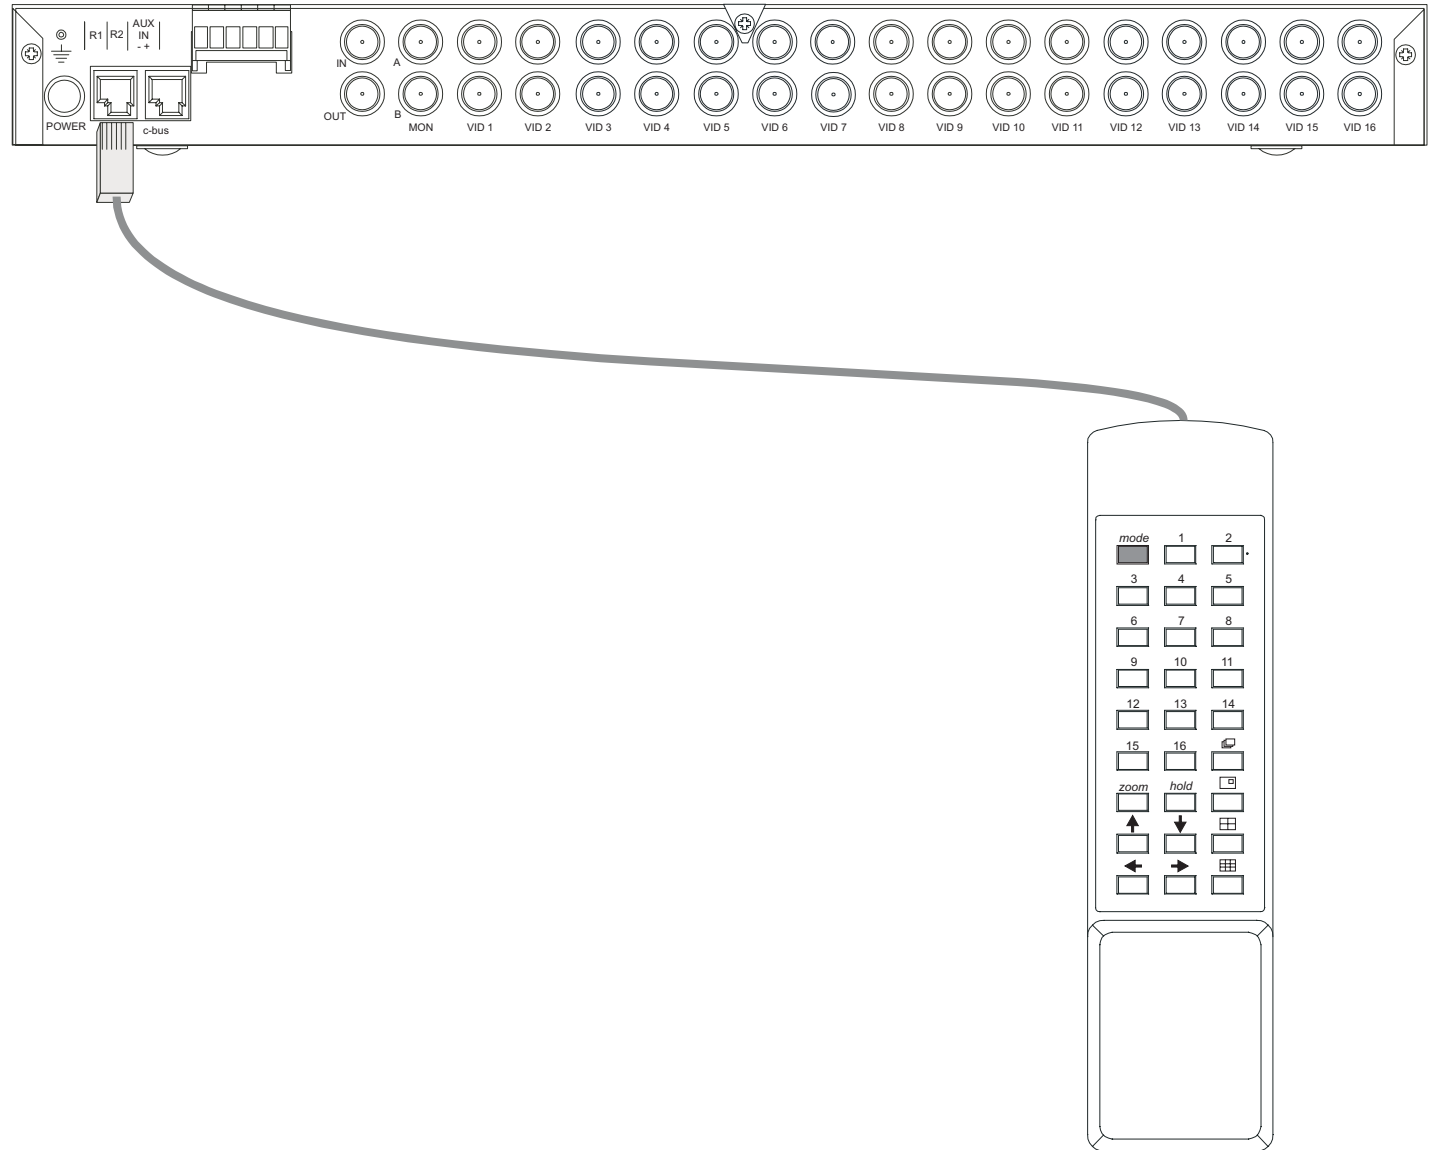

### Connecting the Handheld Controller:

1. Ensure the Sprite Lite is not powered up.
2. Connect the Handheld Controller to one of the ports marked 'c-bus' on the rear of the Sprite Lite.
3. Power up the Sprite Lite.
4. Sprite Lite will automatically detect the Handheld Controller.

### Controlling Sprite Lite with the Handheld Controller

The Handheld Controller mimics the front panel of operation of Sprite Lite (see the Sprite Lite Operator Card for details). There are buttons on the Handheld Controller that are not found on the Sprite Lite front panel:

- Zoom:** Toggles the X2 zoom on or off  
**Hold:** Toggles the hold (picture freeze) function  
**←→↑↓** Controls the cursor within the menus and whilst editing multiscreens. Can also be used to scroll around the screen whilst **Zoom** is on.
